

Advanced Emergency Trauma Course

Monday 10th July – Tuesday 11th July 2023

Aims and Objectives

This course is an intensive two day hands on practical cadaveric workshop for surgeons, military or civilians who are relatively inexperienced in trauma but may be required to perform surgery on patients suffering traumatic injuries under pressure in a trauma and emergency environment.

About the NSTC

Combining didactic teaching and practical procedures with leading edge technology, we offer first rate cadaveric training and continuing professional development in a purpose built facility. We also carry out pioneering research into new techniques and ensuring that you receive the very best surgical training available in the UK, both for today and in the future.
